Dr. Karuna
(Incharge Women Cell)
Dr. Rakhi
(Programme Officer, Unit-II)

ABOUT THE SEMINAR

Water is a valuable gift of God on the Earth. Next to air, water is the most important element for the preservation of life. Water is a finite commodity which, if not managed properly, will result in shortage in the near future. Without water we cannot imagine our lives. Earth is called a blue planet and live planet because of the availability of water. Although, water is tasteless and colorless yet water adds taste, color and fragrances to human lives. We should save water to save human life. The Human race needs to preserve this natural commodity for our future generations also.

The aim of the conference is to provide a platform for Researchers, Academicians, Students, Scholars of Humanities, Management, Social Sciences, NCC Cadets and their concerned ANO's, NSS Volunteers and Programme Officers of NSS Units to discuss their views about water conservation and other contemporary relevant topics. It would be an enriching experience for the participants to interact and share their views with eminent scholars in the concerned field.

THEMES TO BE COVERED IN THE SEMINAR

- The Status of Water in India across States, Water gap@India
- Water management: Conservation, Usage Patterns and Waste water management
