ABOUT THE SEMINAR

Rural livelihood is defined as “the capabilities, assets and activities that rural people require for a means of living.” The thinking on rural development has been evolving, building on insights from this recent understanding of the multiple dimensions of poverty, to adopt a sustainable livelihood approach, which emphasizes the goals of rural poverty reduction, empowerment of people and the promotion of increased security of livelihoods of rural people.

The aim of the seminar is to provide a platform for Researchers, Academicians, researchers and Scholars of Humanities and social sciences to discuss their views about rural livelihoods and contemporary relevance of the topic. It would be an enriching experience for the participants to interact and share their views with eminent scholars in the concerned field.
